Projects

Aim:

A non-profit initiative by Facebook to solve the global connectivity issues by providing the internet to the rural parts all over the world.

Role:

Being the only point of contact from Lucknow region, I racked up and configured 6 different servers from scratch so as to provide the remote access to the Gurgaon team.

Challenge

Net Card for one of the server was faulty

Solution

Used a usb ethernet converter and created an interface

Result

The server was back online in a much lesser time

Projects

**Target
Store**

Aim:

A retail store headquartered at Minneapolis, aims to make the shopping easy and fun for their customers.

Role:

I have gone through many transitions managing CCTV cameras, POS devices, employee access via SQL, workstation performance and currently batch jobs.

Challenge

One of the server was unreachable affecting multiple CCTV cameras

Solution

Verified the hardware issue & created a ticket for local IT team to check for hardware.

Result

Cable was replaced and server was back to healthy

Projects

ORACLE
Health

Aim:

A knowledge sharing platform where associates can expand their workflow knowledge by going through the video lectures.

Role:

My role is to create and record video lectures related to our workflow helpful for the knowledge expansion of the working associates

K-Tube Video
