

Azram Ansari

I am a dedicated and result-oriented Engineer with nearly a decade of expertise in Linux technologies and Cloud Computing. My experience spans roles in system analysis & architecture, where I've developed strong troubleshooting and mentoring skills. I thrive in collaborative environments, aiming for efficient solutions to enhance operations and customer satisfaction.

EXPERIENCE

Oracle Cerner, Yelahanka, Bangalore — System Analyst I

6 June 2022 - PRESENT

- Managing Java cloud-based servers and interfaces.
- Knowledge of Cerner CCL, basic SQL.
- Maintenance and troubleshooting of the architecture build.
- Managing the processing of OpsJob automation messages.
- Troubleshooting based on Linux logs, SPLUNK logs, XML & HL7 messages.
- Mentoring cross-team and new associates on the FSI Java and Data Extraction solution.
- SME of the Data Extraction solution.
- Working with SDE for code correction and patch release.
- Documenting the resolution steps for future reference.
- Collaborating with other teams to resolve issues and ensure customer satisfaction.
- Working on Remedy tickets and being mindful of the SLA.
- Working on change tickets, deploying changes in Prod and Non-Prod.
- Executing DML queries and achieving desired outputs, resolving the issue.

CSS Corp, Whitefield, Bangalore — Engineer L2

2 Jan 2019 - 3 June 2022 (~3.5 years)

- Monitoring and troubleshooting batch jobs using Control-M.
- Running Docker containers processing on CSV files & updating scripts.
- Routing and verifying files via IBM MFT.
- SME of the GRE-Infra-Collaboration group.
- Documenting troubleshooting steps for knowledge articles
